

We would like to know which Arkansas early care and education facilities are engaging in:

1) nutrition education

2) purchasing local products to use in meals and snacks

3) gardens

If you or a facility you know is engaged in any of the three things listed above, please send me the name of the facility, what city the location is in, a contact name (and contact info if available), and which of the activities are occurring.

Please email JennaRhodes@uams.edu or esenglish@uams.edu with information about all of the great things your facility is doing 😊.

We appreciate your help as we work to build a farm to early care and education initiative in Arkansas!
