Notes:  
 The numbers above are estimates of how much inventory we think we will be able to offer for January delivery along with the orders placed in ACDS as of Dec 14, 2016 at 5:15 AM. These estimates are subject to USDA delivery delays, cancellations and other factors beyond the control of the Commodity Office.

The percentages show about how much of your order for January delivery that you can expect to receive when orders exceed supply. For additional details, see individual commodities below, if any.

Remember that this information is very volatile and changes every time an order for the particular commodity is placed, changed or canceled by you or other agencies. It will be updated around the 10th and 20th day of each month.

We hope you will use this information to get the most commodities possible with your SY2017 PAL \$\$.

Backorders of these commodities from deliveries in previous months WILL BE filled in their entirety unless you cancel backorders.
